## **ABOUT GWE**

GLOBAL WATER ENGINEERING (GWE) offers state of the art technology to the industry concerning clean water and green energy, and as such assist industries around the world to sustainably grow their businesses while drastically diminishing energy costs and carbon footprint.

For anaerobic wastewater treatment, GWE is one of the world market leaders. GWE's founder and Chairman/CEO - JEAN PIERRE OMBREGT, is a pioneer of modern anaerobic wastewater treatment. His involvement in the process development dates back as far as 1972.

GWE's unmatched biogas production and COD removal are directly correlated to the maximization of the validated Emission Reductions of the greenhouse gases for the industrial plants.

Our know-how is backed up by more than 500 operating plants in more than 70 countries, with over 150 of the biogas production plants. Our biogas guarantees are unmatched in the industry, and we have a documented 100% track record of meeting and exceeding them.

As an engineering contractor, GWE designs and builds tailor-made solutions that meet the client's needs. We provide all services to complete each project successfully. Projects are executed in line with GWE's Quality Assurance System, based on ISO 9001-2004.

Next to design, build and start-up, GWE operates and maintains wastewater treatment plants in the framework of long-term outsourcing contracts.
