JOB OFFER

PROJECT MANAGER

We are looking for a Project Manager to expand our engineering team in Belgium. Our main Belgian office is located in Loppem (Bruges).

MAIN TASKS:

- You coordinate the realization of industrial wastewater treatment projects from the start till finish.
- You are involved in the procurement of industrial equipment, negotiation and follow-up of civil and electro-mechanical works, commissioning, start-up and more.
- You manage the project financially & contractually.
- you follow up the time schedule, and you are responsible for all communication with the clients, suppliers, subcontractors, and colleagues.
- You report to the top management.

YOUR PROFILE:

- You have an engineering degree or similar technical background.
- You are able to work independently but also in the team.
- You can work in a very methodical way.
- You are critical, can make a good analysis and can report clearly.
- You can work efficiently and effectively.
- You are communicative (with clients/partners/colleagues).
- You are stress resistant and pragmatic.
- You are willing to travel frequently all over the world - flexibility is expected.
- Good knowledge of the English language (both spoken and written), knowledge of other languages is an advantage.

WE OFFER:

- Excellent primary and secondary benefits.
- Reference projects at worldwide known organizations.
- Entrepreneurship.
- A pleasant position in a young international team.

If you are looking for a new challenge in a dynamic international environment, send us your resume/CV and motivation letter at mail.belgium@globalwe.com!

ABOUT GWE

GLOBAL WATER ENGINEERING (GWE) offers state of the art technology to the industry concerning clean water and green energy, and as such assist industries around the world to sustainably grow their businesses while drastically diminishing energy costs and carbon footprint.

For anaerobic wastewater treatment, GWE is one of the world market leaders. GWE's founder and Chairman/CEO - JEAN PIERRE OMBREGT, is a pioneer of modern anaerobic wastewater treatment. His involvement in the process development dates back as far as 1972.

GWE's unmatched biogas production and COD removal are directly correlated to the maximization of the validated Emission Reductions of the greenhouse gases for the industrial plants.

Our know-how is backed up by more than 500 operating plants in more than 70 countries, with over 150 of the biogas production plants. Our biogas guarantees are unmatched in the industry, and we have a documented 100% track record of meeting and exceeding them.

As an engineering contractor, GWE designs and builds tailor-made solutions that meet the client's needs. We provide all services to complete each project successfully. Projects are executed in line with GWE's Quality Assurance System, based on ISO 9001-2004.

Next to design, build and start-up, GWE operates and maintains wastewater treatment plants in the framework of long-term outsourcing contracts.
